

Publications of Professor K S Krishnan, F.R.S.

- On the molecular scattering of light in liquids, K S Krishnan *Phil. Mag.* **50** 679-715 (1925)
- A discussion of the available data on light-scattering in fluids, K S Krishnan, *Proc. Indian Ass. Cultiv. Sci.* **9** 251-270 (1926)
- On the diffraction of light by spherical obstacles, C V Raman and K S Krishnan *Proc. Phys. Soc. Lond.* **38** 350-353 (1926)
- Are gaseous molecules oriented in a magnetic field ?, K S Krishnan *Indian J. Phys.* **1** 35-44 (1926)
- The electrical polarity of molecules, C V Raman and K S Krishnan *Nature, Lond.* **118** 302 (1926)
- Magnetic double-refraction in liquids I : Benzene and its derivatives, C V Raman and K S Krishnan *Proc. R. Soc. A* **113** 511-519 (1927)
- Electric double-refraction in relation to the polarity and optical anisotropy of molecules I. Gases and vapours, C V Raman and K S Krishnan *Phil. Mag.* **3** 713-723 (1927)
- Electric double refraction in relation to the polarity and optical anisotropy of molecules II. Liquids, C V Raman and K S Krishnan *Phil. Mag.* **3** 724-735 (1927)
- The diffraction of light by metallic screens, C V Raman and K S Krishnan *Proc. R. Soc. A* **116** 254-267 (1927)
- Magnetic double-refraction in paramagnetic gases, K S Krishnan *Indian J. Phys.* **1** 245-254 (1927)
- La constante de birefringence magnetique de benzene, C V Raman and K S Krishnan *C. r. hebd. Seanc. Acad. Sci. colon.* **184** 49-451 (1927)
- The magnetic anisotropy of crystalline nitrates and carbonates, K S Krishnan and C V Raman *Proc. R. Soc. A* **115** 549-554 (1927)
- A theory of electric and magnetic birefringence in liquids, C V Raman and K S Krishnan *Proc. R. Soc. A* **117** 1-11 (1927)
- The Maxwell effect in liquids, C V Raman and K S Krishnan *Nature, Lond.* **120** 726-727 (1927)
- A theory of light scattering in liquids, C V Raman and K S Krishnan *Phil. Mag.* **5** 498-512 (1928)
- A theory of the optical and electrical properties of liquids, C V Raman and K S Krishnan *Proc. R. Soc. A* **117** 589-599 (1928)
- A theory of the birefringence induced by flow in liquids, C V Raman and K S Krishnan *Phil. Mag.* **5** 769-783 (1928)
- A new type of secondary radiation, C V Raman and K S Krishnan *Nature, Lond.* **121** 501-502 (1928)
- The optical analogue of the Compton effect, C V Raman and K S Krishnan *Nature, Lond.* **121** 711 (1928)
- A new class of spectra due to secondary radiation I, C V Raman and K S Krishnan *Indian J. Phys.* **2** 399-419 (1928)
- The negative absorption of radiation, C V Raman and K S Krishnan *Nature, Lond.* **122** 12-13 (1928)
- Polarization of scattered light-quanta, C V Raman and K S Krishnan *Nature, Lond.* **122** 169 (1928)
- Molecular spectra in the extreme infra-red, C V Raman and K S Krishnan *Nature, Lond.* **122** 278 (1928)
- The Raman effect in crystals, K S Krishnan *Nature Lond.* **122** 477-478 (1928)
- Influence of temperature on the Raman effect, K S Krishnan *Nature, Lond.* **122** 650 (1928)
- Rotation of molecules induced by light, C V Raman and K S Krishnan *Nature, Lond.* **122** 882 (1928)
- The Raman effect of X-ray scattering, K S Krishnan *Nature, Lond.* **122** 961-962 (1928)
- The production of new radiations by light scattering I, C V Raman and K S Krishnan *Proc. R. Soc. A* **122** 23-35 (1929)
- The anisotropy of the polarization field in liquids, K S Krishnan and S Ramachandra Rao *Indian J. Phys.* **4** 39-55 (1929)
- The Raman spectra of crystals, K S Krishnan *Indian J. Phys.* **4** 131-138 (1929)
- The influence of molecular form and anisotropy on the refractivity and dielectric behaviour of liquids, K S Krishnan *Proc. R. Soc. A* **126** 155-164 (1929)
- Are black soap films birefringent ?, K S Krishnan *Indian J. Phys.* **4** 385-404 (1930)
- Pleochroism and crystal structure, K S Krishnan and A C Dasgupta *Nature, Lond.* **126** 12 (1930)

- Das magnetische verhalten von Ammoniummanganosulfat Hexahydrat bei niedrigen Temperaturen, K S Krishnan *Z Phys.* **71** 137-140 (1931)
- The dispersion of polarization of light scattering, K S Krishnan and A Sarkar *Indian J. Phys.* **6** 193-205 (1931)
- The magnetic anisotropy of ions of the type XO_3 , K S Krishnan *Phys. Rev.* **38** 833-834 (1931)
- Magnetic analysis of molecular orientations in crystals, K S Krishnan *Nature*, Lond. **130** 313 (1932)
- Magnetic constants of benzene, naphthalene and anthracene molecules, K S Krishnan *Nature*, Lond. **130** 698-699 (1932)
- Investigations on magne-crystallic action I. Diamagnetics, K S Krishnan, B C Guha and S Banerjee *Phil. Trans. A* **231** 235-262 (1933)
- Investigations on magne-crystallic action II. Paramagnetics, K S Krishnan, N C Chakravorty and S Banerjee *Phil. Trans. A* **232** 99-115 (1933)
- Negative polarization in fluorescence, K S Krishnan and S M Mitra *Nature*, Lond. **131** 204-205 (1933)
- Feeble anisotropies in paramagnetic crystals, K S Krishnan and S Banerjee *Curr. Sci.*, **1** 239-240 (1933)
- Orientations of molecules in p-benzoquinone crystal, K S Krishnan and S Banerjee *Nature*, Lond. **131**, 653-654 (1933)
- The pleochroism and the birefringence of the NO_3 ion in crystals, K S Krishnan and A C Dasgupta *Indian J. Phys.* **8** 49-66 (1933)
- Pleochroism and birefringence in crystals, K S Krishnan and B Mukhopadhyay *Nature*, Lond. **132** 411 (1933)
- Molecular orientations in p-diphenylbenzene crystal, K S Krishnan and S Banerjee *Nature*, Lond. **132** 968-969 (1933)
- The principal optical polarizabilities of the naphthalene molecule, K S Krishnan *Indian J. Phys.* **8** 431-436 (1933)
- Magnetic anisotropy of graphite, K S Krishnan *Nature*, Lond. **133** 174-175 (1934)
- Large artificial crystals of graphite, K S Krishnan, *Phys. Rev.* **45** 115 (1934)
- Crystal structure of 1, 3, 5-triphenylbenzene, K S Krishnan and S Banerjee *Nature*, Lond. **133** 497 (1934)
- Photo-dissociation of the NO_3 ion and its dependence on the polarization of the exciting light quantum, K S Krishnan and A C Guha *Curr. Sci.* **2** 476-477 (1934)
- Absorption spectra in single crystals of Polynuclear hydrocarbons, K S Krishnan and P K Seshan *Curr. Sci.* **3** 26-27 (1934)
- The absorption spectra of nitrates and nitrites in relation to their photo-dissociation, K S Krishnan and A C Guha *Proc. Indian Acad. Sci.* **1** 242-249 (1934)
- Orientations of impurity molecules included in crystals, K S Krishnan and P K Seshan, *Z. Kristallogr. Kristallgeom.* **89** 538-540 (1934)
- Investigations on magne-crystallic action III. Further studies on organic crystals, K S Krishnan and S Banerjee *Phil. Trans. A* **234** 265-298 (1935)
- Stark splitting of the S level of the manganous ion in crystalline fields, K S Krishnan and S Banerjee *Nature*, Lond. **135** 873 (1935)
- The photo-dissociation of single crystals of potassium and sodium nitrates under polarized light, K S Krishnan and L K Narayanaswamy *Curr. Sci.* **3** 417 (1935)
- An orthorhombic crystalline modification of 1,2; 5,6-dibenzanthracene, K S Krishnan and S Banerjee *Z. Kristallogr. Kristallgeom.* **A 91** 170-172 (1935)
- The magnetic anisotropy and crystal structure of 1,2; 5,6-dibenzanthracene, K S Krishnan and S Banerjee *Z. Kristallogr. Kristallgeom.* **A 91** 173-180 (1935)
- The entropy of manganous ammonium sulphate at temperatures close to absolute zero in relation to magnetic anisotropy of the salt at room temperatures, K S Krishnan and S Banerjee *Proc. Indian Acad. Sci. A* **2** 82-85 (1935)
- The influence of swelling on the abnormal unidirectional diamagnetism of graphite crystals, K S Krishnan and N Ganguly *Curr. Sci.*, **3** 472-473 (1935)
- A simple method for studying the magnetic susceptibilities of very small crystals, K S Krishnan and S Banerjee *Curr. Sci.* **3** 548 (1935)
- Investigations on magne-crystallic action IV. Magnetic behaviour of paramagnetic ions in the S-state in crystals, K S Krishnan and S Banerjee, *Phil. Trans.*, **A 235** 343-366 (1936)
- Diamagnetic anisotropy of crystals in relation to their molecular structure, K Lonsdale and K S Krishnan *Proc. R. Soc. A* **156** 597-613 (1936)
- The magnetic anisotropy of copper sulphate pentahydrate $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$ in relation to its crystal structure, Part I K S Krishnan and A Mookherji *Phys. Rev.* **50** 860-863 (1936)
- On the fluorescence spectra of impurity molecules included in crystals, K S Krishnan and P K Seshan, Rapports sur la photoluminescence presentes a la reunion internationale de photoluminescence, Warsaw, May, 289-299 (1936)
- Temperature variation of the abnormal unidirectional diamagnetism of graphite crystals, K S Krishnan and N Ganguly *Nature*, Lond. **139** 155-156 (1937)
- The magnetic anisotropy of CS_2 , COCl_4 , K S Krishnan and A Mookherji *Phys. Rev.* **51** 528 (1937)
- The magnetic anisotropy of four-coordinated Co^{++} ions in crystals, K S Krishnan and A Mookherji *Phys. Rev.* **51** 774 (1937)

- Magnetic and optical properties of crystals (abstracts of three lectures given in the Cavendish Laboratory, Cambridge, April 1937), K S Krishnan *Nature*, Lond. **139** 810 (1937)
- Magnetic anisotropy of rare earth sulphates and the asymmetry of their crystalline fields, K S Krishnan and A Mookherji *Nature*, Lond. **140** 549 (1937)
- Crystal structure and the magnetic anisotropy of $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$, K S Krishnan and A Mookherji *Nature*, Lond. **140** 896-897 (1937)
- Coupling between the orbital and the spin angular momenta of paramagnetic ions from magnetic measurements, K S Krishnan and A Bose *Nature*, Lond. **141** 329 (1938)
- Investigations on magne-crystalline action V. Paramagnetic salts of the rare earth and the iron groups, K S Krishnan and A Mookherji *Phil. Trans. A* **237** 135-159 (1938)
- The polarization of the absorption lines of single crystals of rare earth salts, K S Krishnan and D C Chakrabarty *J. Chem. Phys.* **6** 224-225 (1938)
- Magnetic studies on rhodochrosite, MnCO_3 , K S Krishnan and S Banerjee *Z. Kristallogr. Kristallgeom.* **A 99** 499-508 (1938)
- The magnetic anisotropy of copper sulphate pentahydrate, $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$, in relation to its crystal structure II, K S Krishnan and A Mookherji *Phys. Rev.* **54** 533-539 (1938)
- The magnetic anisotropy of copper sulphate pentahydrate, $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$ in relation to its crystal structure, III, K S Krishnan and A Mookherji *Phys. Rev.* **54** 841-845 (1938)
- Magnetic anisotropies and the valencies of paramagnetic atoms in crystals, K S Krishnan and S Banerjee *Nature*, Lond. **142** 717 (1938)
- Directional variations in the absorption and the fluorescence of the chrysene molecule, K S Krishnan and P K Seshan *Proc. Indian Acad. Sci. A* **8** (Raman Number) 487-498 (1938)
- Investigations on magne-crystalline action VI. Further studies on paramagnetic crystals, K S Krishnan, A Mookherji & A Bose *Phil. Trans. A* **238** 125-148 (1939)
- The magnetic anisotropy of manganite crystal in relation to its structure, K S Krishnan and S Banerjee *Trans. Faraday Soc.* **35** 385-387 (1939)
- Jahn-Teller theorem and the arrangement of water molecules around paramagnetic ions in aqueous solutions, K S Krishnan *Nature*, Lond. **143** 600 (1939)
- Temperature variation of the magnetic anisotropy of graphite, K S Krishnan and N Ganguly *Z. Kristallogr. Kristallgeom.* **A 100** 530-536 (1939)
- Magnetic studies on braunite, $3\text{Mn}_2\text{O}_3 \cdot \text{MnSiO}_3$, K S Krishnan and S Banerjee *Z. Kristallogr. Kristallgeom.* **A 101**, 507-511 (1939)
- Large anisotropy of the electrical conductivity of graphite, K S Krishnan and N Ganguly *Nature*, Lond. **144** 667 (1939)
- The diamagnetism of the mobile electrons in aromatic molecules, K S Krishnan, Presidential Address to the physics section of the Indian Science Congress, Madras session (1940)
- Landau diamagnetism and the Fermi-Dirac energy distribution of the metallic electrons in graphite, K S Krishnan *Nature*, Lond. **145** 31-32 (1940)
- Electronic specific heat of graphite, K S Krishnan *Nature*, Lond. **145** 388 (1940)
- Dimorphism of diphenyl octatetraene crystals, K S Krishnan, S L Chorghade & T S Ananthapadmanabhan *Nature*, Lond. **146** 333 (1940)
- On an orthorhombic crystalline modification of diphenyl octatetraene, K S Krishnan, S L Chorghade & T S Ananthapadmanabhan *Trans. Faraday Soc.* **36** 1153-1155 (1940)
- Magnetic and thermal properties of $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$ at low temperatures, K S Krishnan *Nature*, Lond. **147** 87-88 (1941)
- The magnetic and other properties of the free electrons in graphite, N Ganguli and K S Krishnan *Proc. R. Soc. A* **177** 168-182 (1941)
- Investigations on the resistivities of binary alloys I. Order-disorder alloys of the CuZn type under equilibrium conditions, K S Krishnan and A B Bhatia *Proc. Natn. Acad. Sci. India A* **14** 153-180 (1944)
- Electrical resistance of liquid metals, K S Krishnan and A B Bhatia *Nature*, Lond. **156** 503 (1945)
- Light scattering in homogeneous media regarded as reflection from appropriate thermal elastic waves, A B Bhatia and K S Krishnan *Proc. R. Soc. A* **192** 181-195 (1948)
- Diffuse scattering of the Fermi electrons in monovalent metals in relation to their electrical resistivities, A B Bhatia and K S Krishnan *Proc. R. Soc. A* **194** 185-205 (1948)
- A simple result in quadrature, K S Krishnan *Nature*, Lond. **162** 215-216 (1948)
- On the equivalence of certain infinite series and the corresponding integrals, K S Krishnan *J. Indian. Math. Soc.* **12** 79-88 (1948)
- Anharmonicity of the lattice oscillations in the alkali halide crystals, K S Krishnan *Nature*, Lond. **166** 114, 571 (1950)
- The frequencies and the anharmonicities of the normal modes of oscillation of alkali halide crystals I. Lattice oscillations, K S Krishnan and Sanat Kumar Roy *Proc. R. Soc. A* **207** 447-460 (1951)
- Elastic constants of alkali halide crystals, K S Krishnan and S K Roy *Nature*, Lond. **168** 869-870 (1951)
- The frequencies and the anharmonicities of the normal modes of oscillation of alkali halide crystals II. Low frequency acoustic modes, K S Krishnan and Sanat Kumar Roy *Proc. R. Soc. A* **210** 481-497 (1951)

- Thermionic constants of graphite, K S Krishnan and S C Jain *Nature*, Lond. **169** 702-703 (1952)
- Polarization field and the acoustic modes of oscillation of alkali halide crystals, K S Krishnan and Sanat Kumar Roy *Nature*, Lond. **170** 159 (1952)
- The thermionic constants of metals and semiconductors I. Graphite, S C Jain and K S Krishnan *Proc. R. Soc. A* **213** 143-157 (1952)
- Evjen's method of evaluating the Madelung Constant, K S Krishnan and S K Roy *Phys. Rev* **87** 581-582 (1952)
- The thermionic constants of the iron group of metals K S Krishnan and S C Jain *Nature*, Lond. **170** 759 (1952)
- The dispersion formulae and the polarization fields, K S Krishnan and S K Roy *Phil. Mag.* **43** 1000-1002 (1952)
- The thermionic constants of metals and semiconductors II Metals of the first transition group, S C Jain and K S Krishnan *Proc. R. Soc. A* **215** 431-437 (1952)
- The temperature variation of the thermo-dynamic potential of a degenerate electron gas, K S Krishnan and P G Klemens *Phil. Mag.* **43** 1224-1225 (1952)
- The polarization fields and the resonance frequencies of the alkali halide crystals, K S Krishnan and S K Roy *Phil. Mag.* **44** 19-32 (1953)
- Thermionic constants of metals and semiconductors III. Monovalent metals, S C Jain and K S Krishnan *Proc. R. Soc. A* **217** 451-461 (1953)
- Temperature distribution along a wire electrically heated in vacuo, K S Krishnan and S C Jain *Nature*, Lond. **173** 166 (1954)
- The distribution of temperature along a thin rod electrically heated in vacuo I. Theoretical, S C Jain and K S Krishnan *Proc. R. Soc. A* **222** 167-180 (1954)
- Temperature distribution in an electrically heated filament, K S Krishnan and S C Jain *Nature*, Lond. **173** 820 (1954)
- The distribution of temperature along a thin rod electrically heated in vacuo II Theoretical (continued), *Proc. R. Soc. A* **225** 1-7 (1954)
- The distribution of temperature along a thin rod electrically heated in vacuo III. Experimental, S C Jain and K S Krishnan *Proc. R. Soc. A* **225** 7-18 (1954)
- The distribution of temperature along a thin rod electrically heated in vacuo IV. Many useful empirical formulae verified, S C Jain and K S Krishnan *Proc. R. Soc. A* **225** 19-32 (1954)
- Thermionic constants of metals and semiconductors IV Monovalent metals (continued), S C Jain and K S Krishnan *Proc. R. Soc. A* **225** 159-172 (1954)
- Determination of thermal conductivities at high temperatures, K S Krishnan and S C Jain *Br. J. Appl. Phys.* **5** 426-430 (1954)
- The distribution of temperature along a thin rod electrically heated in vacuo. V. Time lag, S C Jain and K S Krishnan *Proc. R. Soc. A* **227** 141-154 (1955)
- The distribution of temperature along a thin rod electrically heated in vacuo. VI. End-losses, S C Jain and K S Krishnan *Proc. R. Soc. A* **229** 439-445 (1955)
- The polarization field in an ionic crystal and its influence on the reststrahlen frequency. Read at the Symposium on the Physics of the Solid State, held during the Silver Jubilee Session of the National Academy of Sciences at the University of Lucknow, 27 December, K S Krishnan and S K Roy *Proc. Natl. Acad. Sci. India A* **25** 50-57 (1955)
- Thermionic constants of semiconductors, K S Krishnan and S C Jain *Nature*, Lond. **177** 285 (1956)
- The Drude dispersion formula shown to be applicable to any medium irrespective of the polarization field, K S Krishnan and S K Roy *Phil. Mag.* **1** 926-933 (1956)
- Radiative transfer of energy in the core of a heated tube, K S Krishnan and R Sundaram *Nature*, Lond. **188** 483-484 (1960)
- The distribution of temperature along electrically heated tubes and coils I. Theoretical, K S Krishnan and R Sundaram *Proc. R. Soc. A* **257** 302-315 (1960)
- Effect of specular reflections on the radiation flux from a heated tube, K S Krishnan *Nature*, Lond. **187** 135 (1960)
- Quenching of cation vacancies in doped crystals of sodium chloride, K S Krishnan and S C Jain *Nature*, Lond. **191** 162-163 (1961)
